METHOD AND APPARATUS FOR PRODUCING A DETAIL

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Group I, claim(s) 1-5, drawn to a method of producing a detail with a cover layer.
- II. Group II, claim(s) 6-7, drawn to a device for producing a detail with a cover layer.
- III. Group III, claims 8-11, drawn to a cover layer.
- IV. Group IV, claim 12, drawn to a detail produced of a cover layer.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. The only common technical feature of Groups I-IV, viz., an adhesive cover layer containing color pigment and at least one circuit, are well known in the art, e.g., as flexible printed circuits to be adhered to a support, as evidenced by Riniker (US 4,035,593: Abstract; Fig. 1-3; col. 1, L. 52-68; col. 2, L. 1-4) and McDonough et al. (US 5,920,290: Abstract; Fig. 1, 2; col. 1, L. 56-59). This common technical feature, being

known in the art, is therefore not a special technical feature, such that Groups I–IV do not relate to a single general inventive concept.
